

ADEGOKE OLUSOLA B.

FULL STACK DEVELOPER PYTHON/DJANGO

Lagos, Nigeria | +2348165717300 | ababatunde022@gmail.com | <https://adegoportfolio.netlify.app/>

Experienced Full Stack Developer specializing in python and Django with 8 years' hands-on experience in designing, testing, implementing reliable frameworks and web applications providing innovative solutions to challenging roles.

EXPERIENCE

2021-Present

DevOps Engineer | Tech365

- Work with cross-functional design teams to create and design robust software solutions that improve overall functionality, scalability and performance, writing code and developing tools and integrations to meet cross-platform user needs.
- Monitor automated build and continuous software integration process to drive build/release failure resolution, and collaborate with the team to analyze system solutions based on client requirements.
- Supervise software life cycle from preliminary needs analysis to enterprise-wide deployment and support with product development teams and other stakeholders. .
- Automate and implement system backup and recovery procedures using front-end and back-end tools and applications to deploy next generation platforms.
- Manage testing cycles and coordination of user acceptance testing for software and applications, tuning systems to boost performance and upgrading and modifying systems for higher performance.

2015-2019

Junior Full Stack Developer | Tech365

- Reviewed code to validate structures, assess security and verify browser, device and operating system compatibility. Built optimized landing pages in HTML and CSS for integration and cross-browser compatibility.
- Directed software design and development with team members for functionality and performance, performed unit testing of web applications and troubleshooting issues for learning purposes.
- Teamed up with other analysts to deliver high-availability solutions for mission-critical applications, boosted web traffic by improving navigation and rectified bottlenecks for learning purposes.
- Crafted SEO strategy and intuitive interface for the site to achieve prominent rankings across top browser platforms, using Python, HTML, CSS, Tailwind CSS, JavaScript and SQL/Django to develop and manage databases.
- Worked with back-end and front-end developers to design APIs, took concepts, and produced design mockups and prototypes to strengthen designs, enhance user experiences and improve site interactions while conducting unit testing to deliver optimal browser functionality.
